Current role	Lead Engineering Manager at Helagen
Experience	Fintech, Retail, Investing, Charity, Property, Real Estate, Banking
Technologies	Azure, .NET Core, Angular 14+, SQL, Kubernetes, Postgres

Right now I'm learning...
More about Spec Driven Development and how to best do AI Assisted development while keeping the code quality and keeping the costs down

Work experience

Lead Engineering Manager, Helagen  Apr 2026 - Present (4m)

Help build Enterprise software, business apps, and websites
Fintech · Retail · Investing · Charity

Azure .NET Core Angular 14+

- Lead engineering delivery across product development, architecture, platform reliability, and technical execution for Helagen products and services
- Introduce AI-assisted, BMAD-style development workflows to structure requirements, architecture, task decomposition, implementation, review, and validation, improving consistency and delivery efficiency across the engineering lifecycle
- Translate business and product requirements into clear technical roadmaps, system designs, delivery plans, and engineering priorities
- Support recruitment, onboarding, knowledge sharing, and capability development across the engineering function

Associate Tech Lead, TIQRI  Dec 2024 - Apr 2026 (1y 4m)

Property · Real Estate

SQL Azure .NET Core Angular 14+

- Design and develop Web App, API and databases of a global real estate company (ASP.NET CORE, C#, MS SQL, Azure, Azure Functions, Angular)
- Leading the AI First Engineering Team, introduced BMAD-inspired development workflows to structure requirements, architecture, task decomposition, implementation and validation for AI-assisted development
- Mentored engineers on effective use of AI development tools, including prompt engineering, context engineering, agent workflows and AI-assisted debugging/refactoring
- Mentoring engineers, reviewing work, unblocking technical issues, and improving engineering practices

Fintech · Banking · Investing

Kubernetes

Postgres

Azure

.NET Core

Angular 14+

- Supervised and led a team of 5 Engineers during the development of the global investment research platform
- Successfully communicating with clients to obtain requirements and translate them into proper software solutions
- Administered and managed CI/CD processes using Azure DevOps and Azure Portal, ensuring continuous functionality and problem-solving.
- Carrying forward the responsibilities and tasks from my previous role as a software engineer into my current position.
- Involved in the recruitment & training of new team members

Software Engineer, Aizenit Technologies

Oct 2020 - Oct 2022 (2y)

- Designed and developed API and databases of a global investment research platform for an investment bank. (ASP.NET CORE, C#, PGSQL, MS SQL, Azure)
- Maintenance of legacy investment research webapp (ASP.NET, MS SQL)
- Enhanced an accounting app's features by integrating an Open Banking API (ASP.NET CORE, C#, Angular 11)
- Carried out DevOps & Project Management tasks via Azure DevOps & Azure Portal tools

Software Engineer, INfiniUM Dev

Sep 2019 - Apr 2021 (1y 7m)

- Contributed to research, design and development of projects ex: Web scrapers, Discord and Telegram bots with C# & python.
- Provided consultancy and management to start-up projects.
- Maintenance of legacy CRM software in Car Dealerships in US & Canada

Education

University of Westminster

Sep 2016 - Jul 2020 (3y 10m)

BSc. (Hons) Computer Science

Snippets

SCDF DevOps Setup @ www.slcdf.org

Project Management and working on setting up Windows servers on Azure for Sri Lanka Centre For Development Facilitation org with load balancing and multi user access. Provided support & maintenance for 1 year

More about me

My biggest achievement is...

Launching the new Global Research Platform of an Investment Bank while working at Aizenit Technologies which replaced a system built in the late 90s. Improved the customer engagement by 20%

Interests

Travelling, hiking and cooking are my hobbies

Right now I'm learning...
